TC_10	Both credentials wrong	Negative	PASSED

Detailed Test Case Results

TC_01 — Login with valid credentials (standard_user)

Type: Positive

Steps:

1. Open <https://www.saucedemo.com/>
2. Enter username: standard_user
3. Enter password: secret_sauce
4. Click Login button

Expected Result: User is redirected to the inventory page

Actual Result: User successfully logged in and redirected to inventory page

Status: PASSED

TC_02 — Login with locked out user

Type: Negative

Steps:

1. Open <https://www.saucedemo.com/>
2. Enter username: locked_out_user
3. Enter password: secret_sauce
4. Click Login button

Expected Result: Error message displayed, user not allowed to login

Actual Result: Epic sadface: Sorry, this user has been locked out.

Status: PASSED

TC_03 — Login with wrong password

Type: Negative

Steps:

1. Open <https://www.saucedemo.com/>
2. Enter username: standard_user
3. Enter password: wrongpassword123
4. Click Login button

Expected Result: Error message displayed, login rejected

Actual Result: Epic sadface: Username and password do not match any user in this service

Status: PASSED

TC_04 — Login with wrong username

Type: Negative

Steps:

1. Open <https://www.saucedemo.com/>
2. Enter username: random_user
3. Enter password: secret_sauce
4. Click Login button

Expected Result: Error message displayed, login rejected

Actual Result: Epic sadface: Username and password do not match any user in this service

Status: PASSED

TC_05 — Login with empty username field

Type: Negative

Steps:

1. Open <https://www.saucedemo.com/>
2. Leave username field empty

3. Enter password: secret_sauce
4. Click Login button

Expected Result: Error message asking for username

Actual Result: Epic sadface: Username is required

Status: **PASSED**

TC_06 — Login with empty password field

Type: Negative

Steps:

1. Open <https://www.saucedemo.com/>
2. Enter username: standard_user
3. Leave password field empty
4. Click Login button

Expected Result: Error message asking for password

Actual Result: Epic sadface: Password is required

Status: **PASSED**

TC_07 — Login with both fields empty

Type: Negative

Steps:

1. Open <https://www.saucedemo.com/>
2. Leave both username and password fields empty
3. Click Login button

Expected Result: Error message displayed

Actual Result: Epic sadface: Username is required

Status: **PASSED**

TC_08 — Login with problem_user

Type: Positive

Steps:

1. Open <https://www.saucedemo.com/>
2. Enter username: problem_user
3. Enter password: secret_sauce
4. Click Login button

Expected Result: User is redirected to the inventory page

Actual Result: problem_user logged in and redirected to inventory page successfully

Status: **PASSED**

TC_09 — Login with performance_glitch_user

Type: Positive

Steps:

1. Open <https://www.saucedemo.com/>
2. Enter username: performance_glitch_user
3. Enter password: secret_sauce
4. Click Login button

Expected Result: User is redirected to inventory page (may take longer than usual)

Actual Result: performance_glitch_user logged in successfully, page loaded slow but worked

Status: **PASSED**

TC_10 — Login with completely fake credentials

Type: Negative

Steps:

1. Open <https://www.saucedemo.com/>
2. Enter username: fakeuser
3. Enter password: fakepass
4. Click Login button

Expected Result: Error message displayed, login rejected

Actual Result: Epic sadface: Username and password do not match any user in this service

Status: **PASSED**

Observations

- All 10 test cases passed successfully with no failures.
 - The website correctly blocks locked out users with a clear error message.
 - Empty field validations are working — username is checked first before password.
 - Wrong credentials always show the same generic error message, which is good practice as it does not reveal which field is wrong.
 - performance_glitch_user takes noticeably longer to load compared to other users but login still works.
 - problem_user logs in fine but may show visual issues on the inventory page after login.
